

Job Title- Sr. WordPress Developer

Qualification- Degree in Computer Science or Engineering background

Experience- 2-3 Years

About the Role:

We're searching for a Sr. WordPress Developer to join our team! You'll be in charge of creating cool, easy-to-use websites that people love to interact with. Working closely with our team, you'll handle everything from coming up with ideas to keeping the websites running smoothly.

Key Deliverables & Accountability:

- Design and build a highly interactive, user-friendly web application
- Develop and integrate design user interfaces for online and mobile responsive websites.
- Perform the entire software development (web application) lifecycle, from conceptualization, design, development, testing, deployment, maintenance, and support
- Collaborate with cross-functional teams to define, design, and ship new features to optimize web app performance
- Keep up-to-date with the latest technologies, best practices, and industry trends

Skill Set Requirement:

- Strong experience on WordPress (WP) platform and its architecture.
- Good experience on themes and plugins developments and their integration.
- Good experience on HTML5/CSS3, JavaScript.
- Expert in PHP/MYSQL
- Knowledge on LAMP/XAMPP based applications.
- Strong knowledge on version control systems like Gitlab, Github or similar ones.
- Strong experience on PHP upgrades.
- Someone available in PST time-zone will be great to have.
