

Job Title- Lead-QA

Qualification- B.Tech /M.Tech/ BS/MS

Preferred Industry - Telecom/Mobile/Wireless

Experience- 3-5 Years

About the Role:

You will analyze requirements, suggest solutions, and assist in the development of features as planned. You will typically be involved end to end in the development cycle, preparing test plans, test cases, execution, reporting and resolution of issues.

You will work closely with developers to ensure a high-quality deliverable.

Key Deliverables & Accountability:

- Estimate, prioritize, plan and coordinate testing activities
- Design, develop and execute automation scripts using open-source tools.
- Create detailed, comprehensive, and well-structured test plans and test cases(Positive& Negative)
- Work closely with Lead-Dev and Business Analyst to define the test framework to ensure proper SDLC

Skill Set Requirement:

Test Automation:

- Expertise in automation tools and techniques, such as test automation frameworks, scripting languages, and continuous integration/continuous delivery (CI/CD) pipelines
- Exposure to container management and orchestration technologies such as JMeter, Selenium, Charles etc.
- Expertise in backend testing and writing automated test scripts. (Must have) Experience with Restful API testing (such as postman)
- Competent in Python/Java programming with experience in test automation and interfacing with REST APIs.
- Good understanding of XML, JSON Messages.
- Experience in UI testing tools such as Playwright and the ability to make framework changes.
- Experience working in an Agile/Scrum development process.

Test Strategy & Expertise

- Define test strategy and test plan containing test cases (functional and non-functional), ensure traceability with specifications and customer requirements.
- Ensure compliance of test strategy with CI/CD guidelines, Green IT guidelines and all quality guidelines (SDL, STDL), QA best practices/standards from the industry (ISTQB.)

- Design test cases and write test case scripts.
